

Document of the Month

This month we celebrate the work of our Garden department, which since its initiation in 1956 has been striving hard to bring about a symbiosis of industry and nature. Within a decade of its existence, recognitions started coming its way for its superior quality produce and tireless efforts at making lives greener and healthier. The year 1965 was a noteworthy year as the department was felicitated with 3 distinct accolades – the prestigious Governor's Cup, Times Shield for Industrial Gardens and a special award for the successful installation of a traffic island on Mayo Road, Mumbai.

Our Document of the month for March is a note dated 6th March 1965 and drafted for an upcoming issue of the Godrej Staff Club Bulletin. The note was prepared by Mr. Murthy, a Godrej employee and proudly enlists the stunning achievements of the Garden Department.
